

❓ PROPOSAL SUBMISSION REQUIREMENTS & GUIDELINES

Platform: Project Sahyog (सहयोग) - B2G Innovation Procurement Sandbox **Document**

Version: 1.0 (Standard Standardized Bidding Format)

IMPORTANT NOTICE: THE DOUBLE-BLIND PROTOCOL

Project Sahyog utilizes a strict **Two-Envelope System** combined with an AI-driven Double-Blind Evaluation.

- **DO NOT** include your company name, founder names, logos, or contact details in **Envelope A (Technical Proposal)**.
- Any PII (Personally Identifiable Information) detected in the Technical Proposal may result in automated disqualification.

SECTION 1: PRE-REQUISITE CLEARANCE (Automated)

Startups are exempt from submitting CA-certified balance sheets or Earnest Money Deposits (EMD) under the DPIIT Startup Exemption Framework. You only need to provide the following via the platform dashboard:

1. **DPIIT Recognition Number:** For instant API-based verification of startup status.
2. **Company Identification Number (CIN) / GSTIN:** For legal compliance.
3. **Penny-Drop Verified Bank Account:** Linked to the Nodal Agency's Smart Escrow for milestone payouts.
4. **Digital Self-Declaration:** A one-click e-Sign accepting the "Fail-Fast Sandbox Terms" (Zero Liquidated Damages on failure, agreement to use synthetic data).

SECTION 2: ENVELOPE A - TECHNICAL PROPOSAL

(To be evaluated by the Independent Domain Jury out of 70 Marks)

Your technical proposal must be uploaded as a structured document containing the following five sections. **Maximum length: 5 Pages.**

1. Executive Approach & Methodology

- A concise explanation of how your core technology solves the specific Problem Statement (PS).
- Explanation of your algorithmic approach (e.g., specific ML models, IoT sensor arrays, or blockchain architecture).

2. System Architecture & Tech Stack

- A high-level system architecture diagram.
- A clear list of frameworks, databases, and deployment environments utilized.
- Details on system scalability (e.g., "Can handle 10,000 concurrent API requests").

3. Live API / Sandbox Benchmark Endpoint

(Crucial for Stage 2 Automated Evaluation)

- **REST API URL & Auth Token:** Provide a secure endpoint to your hosted model. The Sahyog platform will ping this endpoint with synthetic test data to automatically measure your Latency (ms), Uptime (%), and baseline Accuracy.
- **API Documentation:** A brief JSON schema showing expected inputs and outputs.

4. Data Privacy & Security Architecture (DPDP Act 2023)

- Explicit declaration of how data is encrypted in transit (TLS 1.3) and at rest (AES-256).
- Confirmation that the solution can be trained and tested strictly on **Synthetic/Dummy Data** provided by the Nodal Agency, ensuring zero exposure to real citizen PII during the 90-day pilot.

5. Hardware & Cloud Dependency List

- Itemized list of specific cloud infrastructure (e.g., AWS EC2 instances, Azure credits) or hardware (e.g., Edge AI cameras, IoT gateways) required for the pilot.
- *Note: The 20% Mobilization Advance will be issued as an e-RUPI Voucher strictly locked to these requested categories.*

SECTION 3: ENVELOPE B - FINANCIAL BID

(Locked in Smart Escrow & Evaluated by QCBS Engine out of 30 Marks)

The financial bid remains hidden from the Jury and is only opened by the system after Technical Scores are locked.

1. Pilot Execution Bid (90-Day Sandbox Cost)

- State the exact R&D and operational cost required to execute the 90-day pilot.
- **Strict Constraint:** This amount MUST be less than or equal to the "Max Pilot Ceiling" published by the Nodal Officer.
- *Example:* If the ceiling is ₹15,00,000, your bid must be $\leq$ ₹15,00,000. This quoted amount will be locked in the Smart Escrow.

2. Commercial Scale-Up Unit Rate (GeM Rate Card)

- Provide your commercial pricing for post-pilot, Pan-India rollout (e.g., "₹50,000 per camera license per year" or "₹10 per API call").

- **Constraint:** If you win the pilot, this unit rate is locked for the **18-Month Tech Shelf-Life** and will serve as your benchmark rate for the Swiss Challenge under GFR Rule 194.

SECTION 4: SUBMISSION CHECKLIST

Before clicking "Submit", ensure you have complied with the following:

- ☐ **No PII** (Company names/logos) is present in Envelope A.
- ☐ **API Endpoint** is live, secure, and ready for automated testing.
- ☐ **Financial Bid** is strictly below the published Max Pilot Ceiling.
- ☐ **DPDP Compliance** regarding Synthetic Data is explicitly accepted.
- ☐ **DPIIT Number** is entered correctly for instant verification.
